

Shane West

Full Stack Web Developer

(865) 805-5212
Knoxville, TN 37915
swest4@gmail.com

Full Stack Developer with 10 years of experience building high-performance digital products across web and mobile platforms. Proven success in leading major development initiatives, including enterprise-scale rebuilds. Skilled in modern JavaScript frameworks (React, Next.js, Svelte), backend systems (Node.js, .NET, T-SQL), and architecting scalable systems. Passionate about building performant user-centric experiences.

PROFESSIONAL EXPERIENCE

Technical Lead Web Developer at Pilot Travel Centers (Aug 2025 – Present)

- Created a Svelte component library from the components on Pilot's recently launched website.
 - Ingested Figma tokens for each tenant to make it simple to stand up alternate themes for multiple brands.
 - Expanded test coverage to cover all components in the library.
 - Used the component library to quickly stand up a new website for Tartan Oil.
- Helped deliver a management interface for customer service and travel center staff to manage paid truck parking at travel centers.

Lead Web Developer at Regal Cinemas (Dec 2020 – May 2025)

- Primary architect and lead web developer for a full re-write of the Regal and Cineworld websites in Next.js covering static content, advertising, custom site takeovers, showtime browsing and selection, account management, loyalty program management, booking, concessions ordering, and checkout.
 - Leveraged a custom incremental static generation model to keep all web content current. Built a Directus CMS backend for managing content and static pages.
 - Built platform in a scalable container architecture with separate nodes for independently scaling different areas of the site (browsing, booking, page building).
- Created a backend for frontend to manage incoming movie, theatre, and showtime data and drive static generation for the website.
- Worked on building hybrid mobile apps based on the website in a React Native wrapper to leverage a single codebase for web, iOS, and android.

Web Developer II at Regal Cinemas (Jul 2019 – Dec 2020)

- Built new account management, ticket booking, and checkout websites for Regal and Cineworld in React with a .NET MVC backend. Worked on showtime browsing and CMS updates for the global web platform in Vue and Java.
- Added subscription program sign-up, usage, and management for Regal and Cineworld.
- Integrated ADA compliance measures, including resolving WCAG 2.0 audit findings.

System Analyst I at Regal Cinemas (Apr 2017 – Jul 2019)

- Sole developer for internal ASP.NET MVC apps replacing legacy HR, payroll, and incident management systems.
- Built marketing asset tracking tools with drag-and-drop scheduling, data filtering, and automated invoicing.
- Assisted external contractors in the early stages of replacing the Regal website with Cineworld Group's

global web platform.

Software Developer at Enhanced Systems Consulting (Jun 2014 – Mar 2017)

- Built frontend and backend parts for an ASP.NET MVC single sign-on system for a cable/internet/utility provider encompassing billing, TV and internet upgrades, email, voicemail, meter data history, and DVR management.
- Built and maintained a C# WPF application for managing shipping and receiving for a metal parts manufacturer. The application dynamically builds shipping manifests and internal reports using SSRS. The application interfaces with a scale, conveyor, and barcode reader to weigh and count parts automatically.

EDUCATION AND ACHIEVEMENTS

B.S. in Computer Engineering – University of Tennessee, Knoxville, 2013

KnxHx Hackathon 2020 Winner – Best Overall, Best in Data, Fan Favorite
